Code of Conduct

The Sherman Centre and the McMaster University Libraries are committed to fostering a supportive and inclusive environment for its presenters and participants.

As a participant in this session, you agree to support and help cultivate an experience that is collaborative, respectful, and inclusive, as well as free of harassment, discrimination, and oppression. We reserve the right to remove participants who exhibit harassing, malicious, or persistently disruptive behaviour.

Please refer to our code of conduct webpage for more information: [**scds.ca/code-of-conduct/**](https://scds.ca/code-of-conduct/)

Certificate Programs

The Sherman Centre for Digital Scholarship Certificate of Attendance

The Sherman Centre's certificate program recognizes attendance at our workshops. It complements degree training, supports the development of critical competencies in data analysis, research data management, and digital scholarship, and formalizes core skills fostered by our workshops.

Participants are invited to attend seven workshops and receive a certificate of attendance. To verify your participation in today's workshop, we will provide a code and additional instructions at the end of the session.

You can learn more about the certificate program at scds.ca/certificate-program

Credit Eligibility

This workshop counts toward credit for students in the Faculty of Science who are enrolled in **SCIENCE 2SF1: Digital Skills Workshop**.

Winter / Spring 2026: Upcoming Workshops

Data Analysis Support Hub

March 26: Creating Data Visualizations with Javascript

April 2: Microdata Analysis with Python using Statistics Canada Data

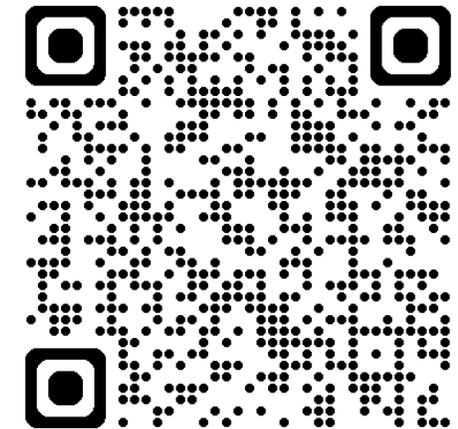

Research Data Management

May 5: Students deserve Research Data Management! Teaching with the RDM Educators Kit

May 12: Data Management Plan Bootcamp (In-Person)

Do More with Digital Scholarship

March 19: Social Media Data! Practical and Ethical Collection, Visualization, and Management

Register for Upcoming Workshops: <https://u.mcmaster.ca/scds-workshops>

Learning Objectives

By the end of this workshop, you will:

- Use data from an open data portal to create a basic map
- Design, build, and publish a dashboard that conveys information to your audience

Overview of ArcGIS Dashboards

- Data visualization
- Highly interactive
- Easy to use
- Maps, charts, tables, infographics
- Elements are linked

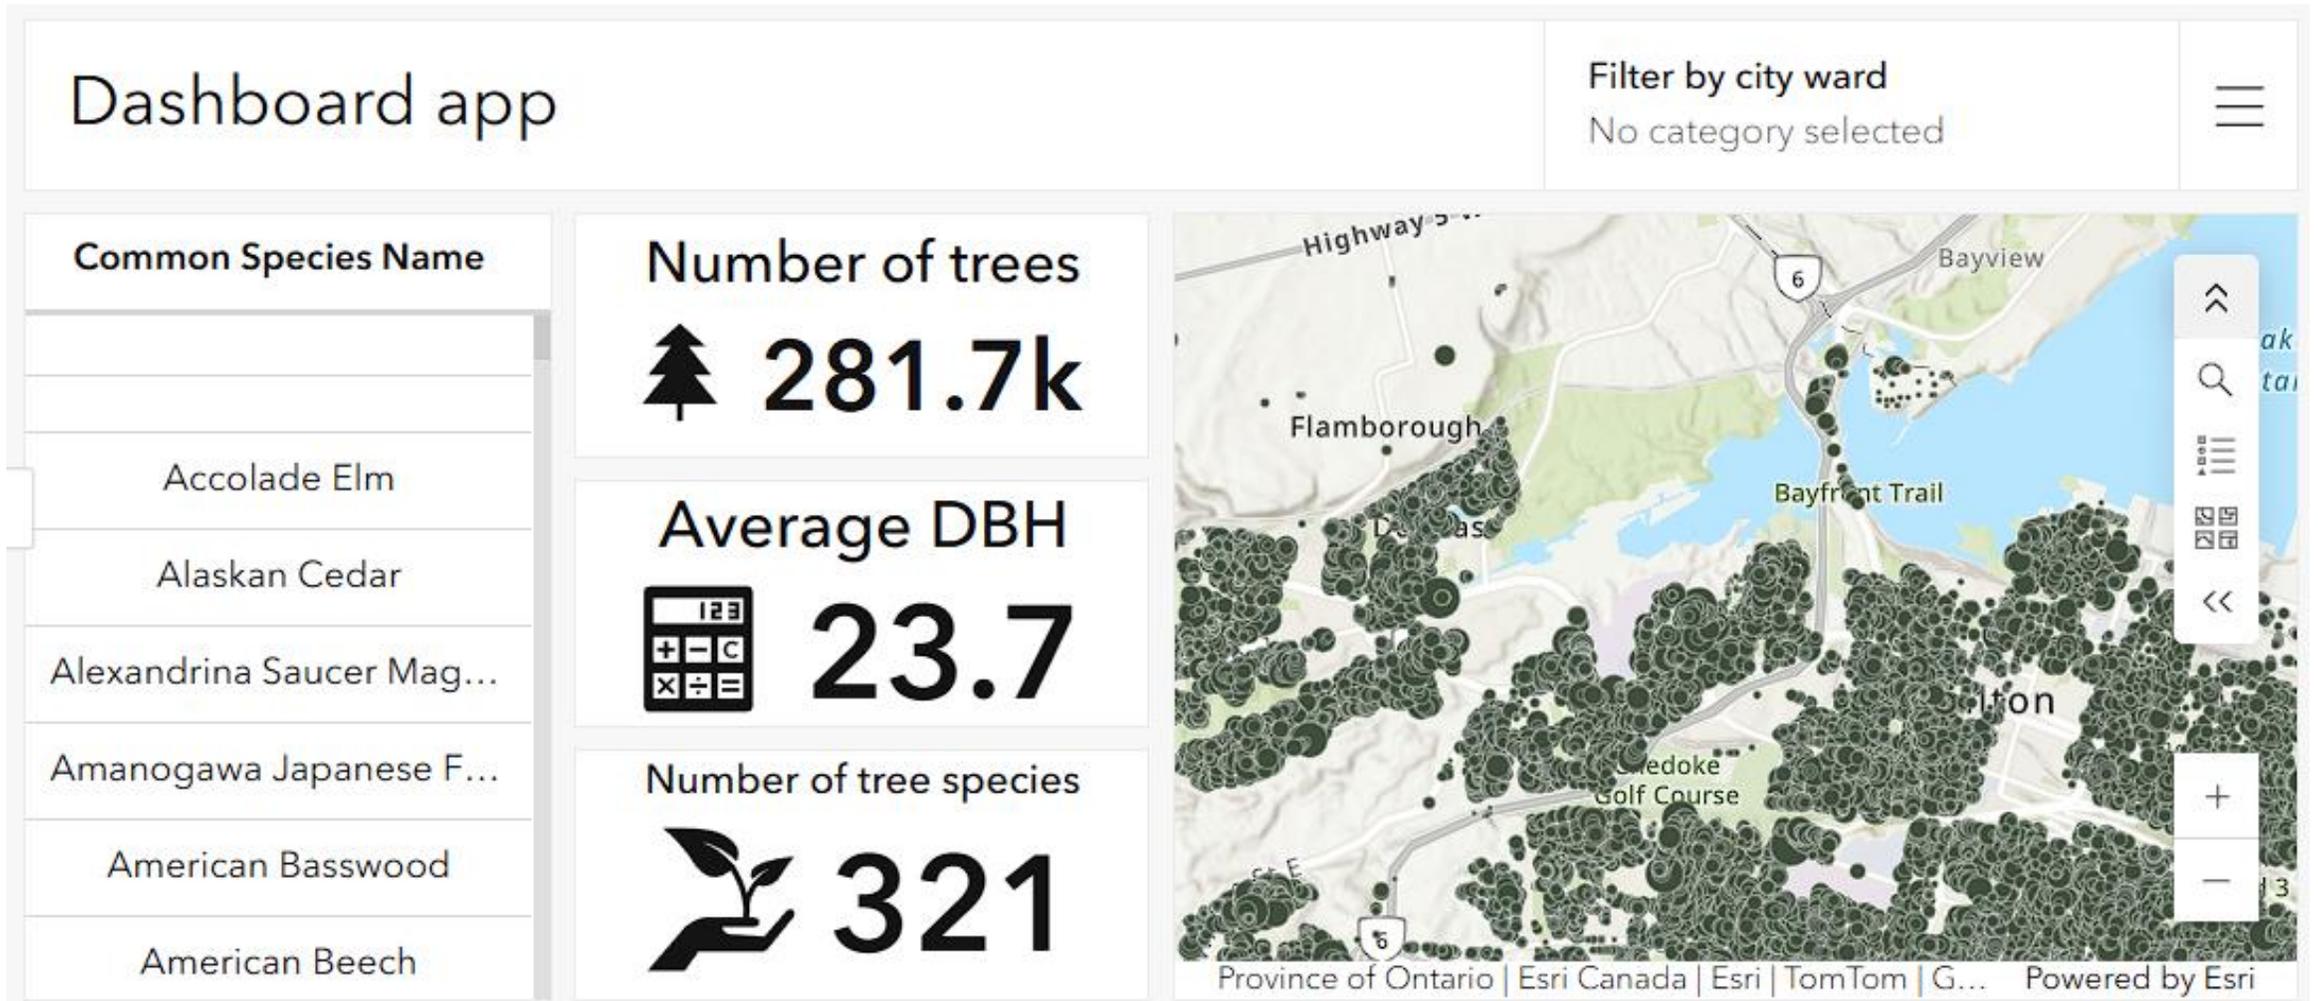

Pros

- Good for map-based visualizations and interactions
- Connects with other ArcGIS applications
- Able to use data "views" which doesn't impact, or show, source feature layer
- User-friendly

Cons

- Analysis takes place outside Dashboards
- Customization is limited
- Data stored in ArcGIS Online / Living Atlas
- Potential for information overload
- Limited web accessibility with maps and other widgets
- Accounts costly outside McMaster's license
